Vivliostyle Viewer

Vivliostyle Viewer

Vivliostyle Viewer is a web application displaying and typesetting HTML+CSS documents.

How to use

To use Vivliostyle Viewer in a local environment

To use Vivliostyle Viewer in a local environment, it is convenient to use the preview command of the Vivliostyle CLI. For information on how to install and use the Vivliostyle CLI, see Vivliostyle CLI User Guide, and Preview the typesetting results.

If you want to use Vivliostyle Viewer in a local environment by other means, start a web server by following the instructions described in the 1. https://github.com/vivliostyle/vivliostyle.js/blob/master/packages/viewer/README.mdREADME[*1] attached to the distribution package.

Public online Vivliostyle Viewer

You can also use the public online Vivliostyle Viewer (2. https://vivliostyle.org/viewer/vivliostyle.org/viewer/[*2]) that has always been updated to the latest release version. For early bird users, there is also canary version available 3. https://vivliostyle.vercel.appvivliostyle.vercel.app[*3].

Placing Vivliostyle Viewer on your site

You can place the unzipped copy of the Vivliostyle Viewer distribution package (download from 4. https://vivliostyle.org/download/https://vivliostyle.org/download/[*4]) in your site, and then you can publish your publications to be viewed with Vivliostyle Viewer on your site.

To use it in a Node.js application, use the npm package 5. https://www.npmjs.com/package/@vivliostyle/viewer@vivliostyle/viewer[*5].

The start page of Vivliostyle Viewer

When you open 6. https://vivliostyle.org/viewer/Vivliostyle Viewer[*6] without specifying parameters, an "Input a document URL" box, **Book Mode** and **Render All Pages** check boxes, and usage help is displayed.

Access to 7. https://vivliostyle.org/viewer/https://vivliostyle.org/viewer/[*7].
